

THE REPOWERED COMMUNITY

A clean, affordable energy future for everyone

**Repowering London is creating
a world in which clean energy
works for everyone.**

**Our goal is for communities
in every town and city in the
UK to be empowered with
clean energy by 2030.**

We're solving the world's three big climate change problems

Net-zero is not working

We will currently miss our net-zero targets and are not keeping global warming to survivable levels.

Lack of investment

We need more fundable, self-sustaining, proven options for cutting the carbon emissions responsible for global temperature rises.

Inequality

Energy costs are increasing and the benefits of clean energy are not being shared with those who need them most. This stops people from changing their behaviour as required to reduce the consequences of higher global temperatures.

The great news is that clean energy holds the potential to tackle all three of these issues.

But only if it is deployed at scale, in the right way.

This requires a new kind of clean energy innovation with care for people at its core.

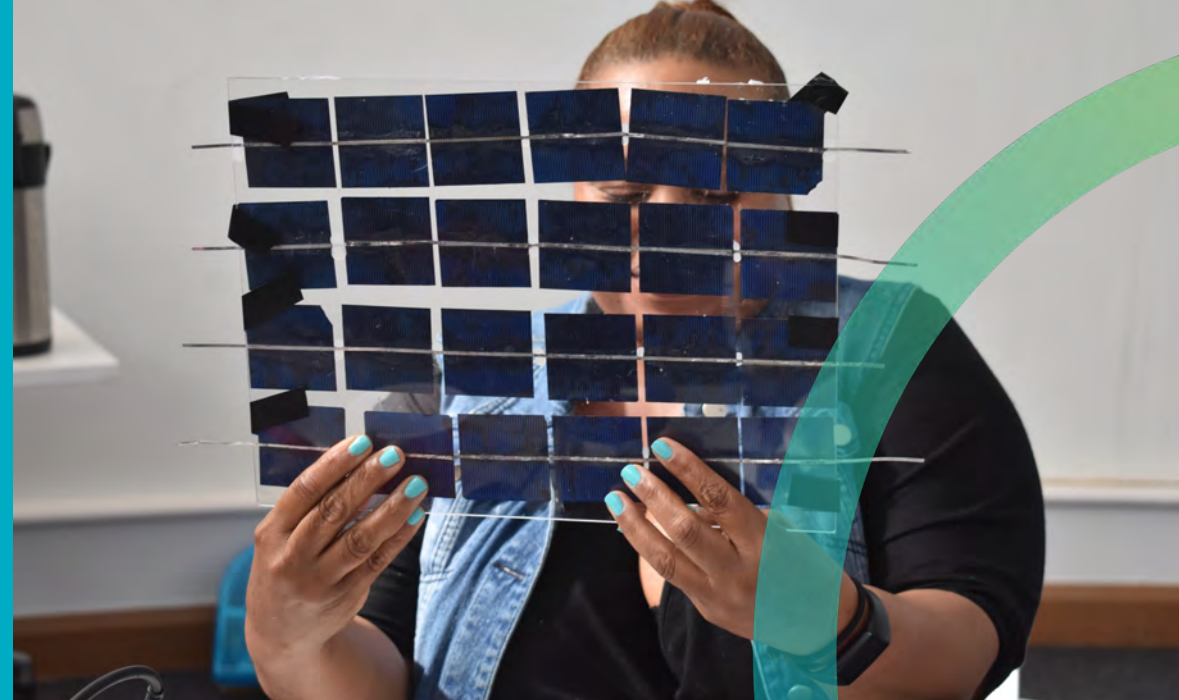

That's why we've created: **Repowered Community**

This clean energy model from **Repowering London** strengthens communities by delivering clean energy hand in hand with long-term local services and benefits. These range from skills training to lower energy bills and funds for local investment.

What we are:

The UK's most experienced urban community energy developer

Working in partnership with major London councils and national funders in a way that puts real people at the heart of the energy system and ensures they get the benefits created by using clean energy.

What we are not:

A large-scale solar farm or wind project developer creating projects owned by a limited number of stakeholders who will take a profit.

**We know that local ownership
of clean energy creates more
prosperous, happier and healthier
places to live.**

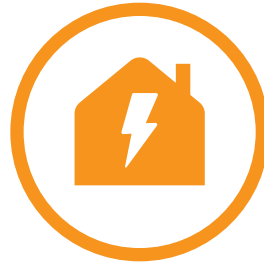

Repowered Community:

Our delivery model

Local ownership

Projects are co-created with the wider community in a way that involves people who have traditionally been hard to reach.

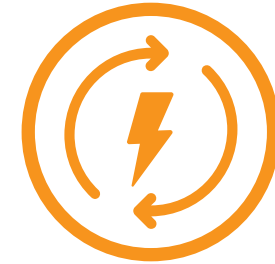

Clean energy generation

Boosted by our own low-cost finance option and commitment to using the best technology to suit the task – whether a solar energy install or energy-efficient retrofit.

Green skills

People are prepared for a rewarding and resilient future with employability and green energy training, climate education, and energy efficiency tools and advice.

Affordable energy for everyone

By providing lower-cost energy, creating warmer and healthier homes and less pollution we can end fuel poverty and reduce urban health deficits.

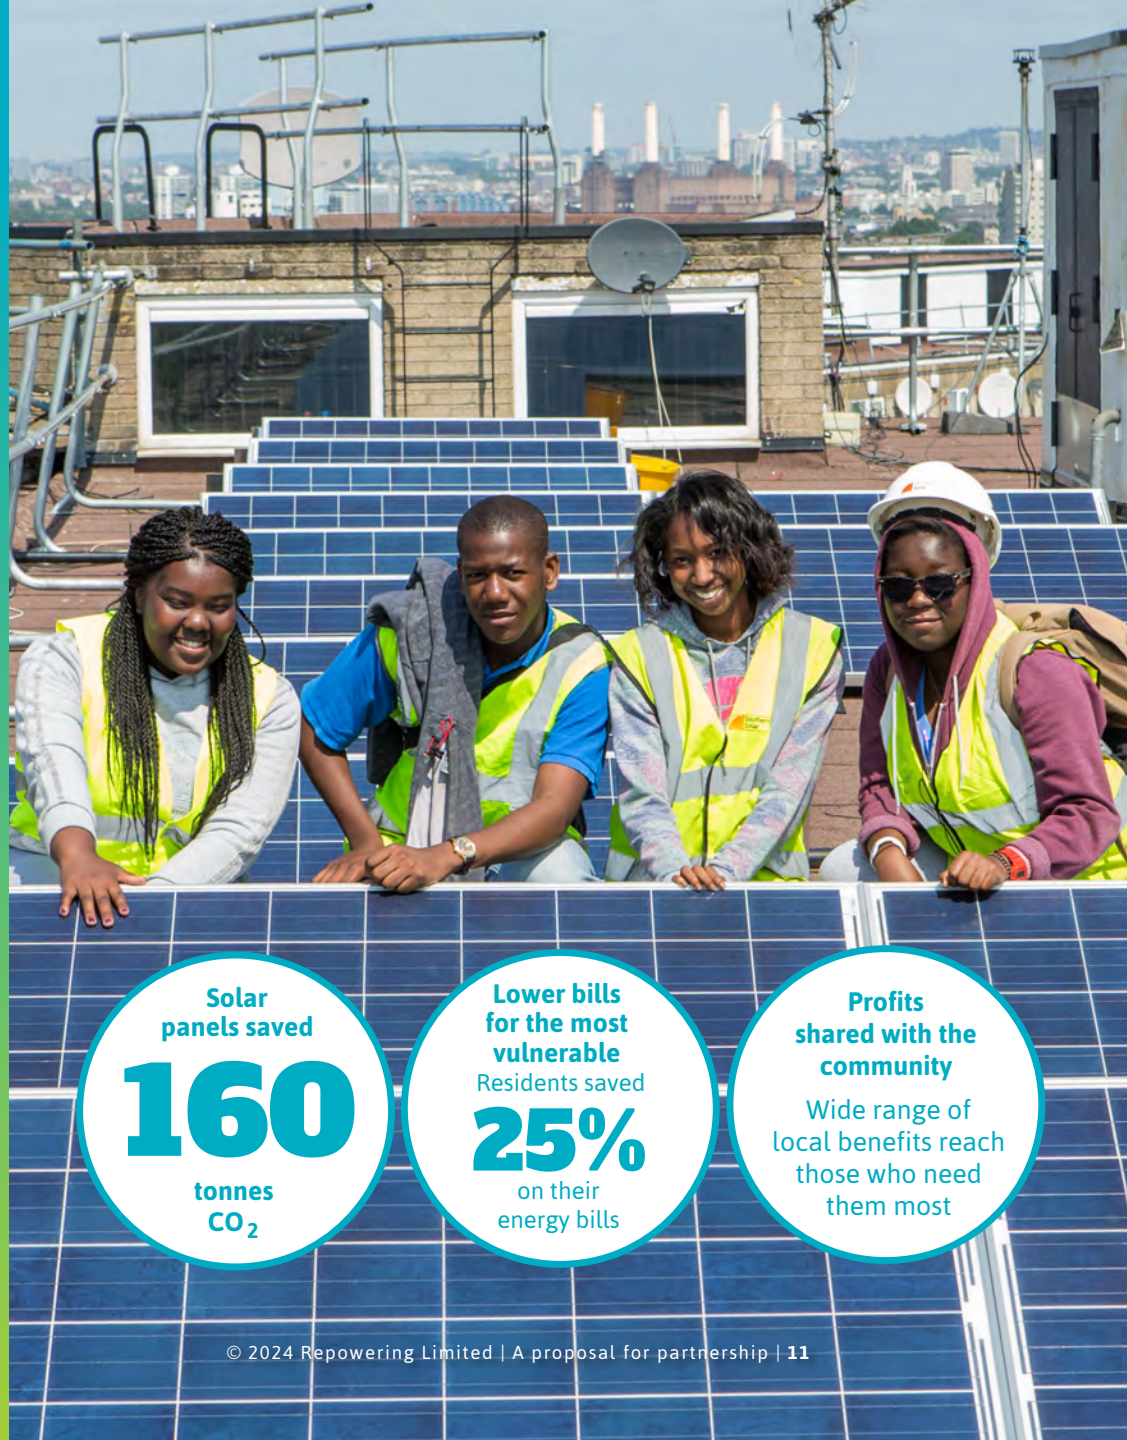

A Repowered Community in practice: Roupell Park

In 2013, **Repowering London** supported residents to install solar power across a number of social housing blocks in Brixton, South London.

The electricity powered lifts and lights, and profits from its sale supported local initiatives chosen by residents through a ring-fenced community fund. For instance, providing free meals to families during the COVID-19 pandemic.

Local young people were trained in community development and installed the solar panels. They also learned to install energy-saving measures across the estate.

Since 2021, residents have been able to buy the solar power generated on the Roupell Park roofs at **17% of market rate - saving people 25%** on their annual energy bills.

Solar
panels saved

160

tonnes
CO₂

Lower bills
for the most
vulnerable
Residents saved

25%

on their
energy bills

Profits
shared with the
community

Wide range of
local benefits reach
those who need
them most

Why partner with **Repowering London?**

Net-zero delivery

Over just 10 years, our team has established **10 community-energy co-ops across London**, working closely with local councils and supporting the Mayor of London's net-zero targets.

Investment innovation

We've pioneered a **fast-track funding vehicle to move projects quickly** and offer a proven model for building fundable, self-sustaining social enterprises.

Ending inequality

Our community-led approach **cuts energy costs for those who are most vulnerable**, reducing inequality and supporting positive behaviour change.

Making a difference in London

11

Community Benefit Societies & co-operatives supported

1,120

tonnes of CO₂ emissions expected to be avoided by our solar installations

~900

people directly involved as local investors, co-operative members and volunteer directors

£225k

Ringfenced in Community Funds an earmarked for spending on local priority projects

We are now working in **9** of London's 32 boroughs and the City of London

Established projects

Barnet, City of London, Hackney, Hammersmith & Fulham, Kensington & Chelsea, Lambeth and Newham

2,000

children and young people involved in and inspired by climate and energy learning

150+

young people received paid training, internships or mentoring

~60

people mentored in governance and management

Developing work

Southwark, Waltham Forest, and Westminster

Reaching further: Climate activation

The IPCC has identified behaviour change as a key component for reaching climate targets and in the UK, **84% of people agree that if everyone does their part*** we can reduce the effects of climate change. But people need simple, practical solutions.

We provide just that.

Participants in our projects gain awareness and skills that they take into their personal lives and communities.

Our supporters and members have told us:

Were influenced to take action to reduce energy consumption.

Switched to a green/renewable energy supplier.

Involvement gave them confidence to invest in similar projects.

Feel more connected to their local community.

We are delivering results that change lives right now.

We are creating high-impact clean energy projects that enable urban communities to regenerate and thrive.

**Help us bring Repowered
Communities to towns and cities
across the UK.**

**We can create a world where
clean energy works for everyone.**

Our partners and stakeholders:

Local Authorities

Grant Funders

Corporate & Delivery Partners

An award-winning organisation
